One of the pleasant features was

the visit of delegate M. C. Barney of Flint, who visited the school Wednesday morning and gave a forty-five minute address on Sherman's march to the sea, in which campaign he took a part. He told of many incidents of this memorable event that are not or this memorable event that are not recorded in history. It was an inspiring talk and brot out prolonged applause, necessitating further remarks. At the conclusion every pupil went forward and shook hands with the speaker and with several of his comrades who were with him.

Melvin A. Bates of this city extended Meivin A. Bates of this city extended to the officers and visiting delegates the official welcome of the city. After a piano trio and encore by Mrs. Hollidaye Mrs. Doroh and Miss Charlotte Flagg, response was made by Maj. Gen. R. J. Gillespie. The speaker stated that the organization had been in 20 national conventions and that they had never been given such a welcome as they had had in Crayling. The conventions held in

in Grayling. The conventions held in Detroit and other large cities had been cold and uncheerful while here they had been warmly welcomed and everybody was enjoying the meetings. On behalf of the members of the two On behalf of the members of the two leagues he offered a rising vote of thanks. He said the motto of the order was, "levalty, patriotism and protection," and told of the work of the order and of many of its hopes and aims. The stars and stripes which are emblazoned in their League colors, reaches around the world and that now there is no nation but that takes their hats off whenever they see them. He said that he believed our most serious problem today was the immigration problem, and that we must all help to educate the foreigner that America is for Americans and that it they come here they must be-

the objects of the order, which are primarily to "Unite socially and frate-nally the wives, sisters and daughters of the organization." Like the former speakers she expressed her ters of the organization." Like the former speakers she expressed her pleasure in having selected Grayling for their meeting instead of a larger city. Another matter that she wanted the public to understand was that their organization was not a fraternal benefit insurance order but instead is a "funeral benefit order." She closed her talk by giving the Legion flag salute.

Supt. B. E. Smith of the Grayling schools said that our schools are in hearty accord with the principles of the convention and assured the visi-tors that the doors of Grayling school would always be open to them. Mr. Rasmus Hanson of this city,

LIKES HIS NEW POSITION.

John B. Buehler, former physical instructor of the Grayling schools, is this year occupying a similar position in the schools at Nashwauk, Minnesota. The following letter addressed to Supt. B. E. Smith will be of interest to the pupils and others in Grayling who knew Mr. Buehler and we appreciate the privilege of printing it. It reads as follows:

Sept. 17, 1921.

Dear Mr. Smith.

I thought perhaps you would like to know how I enjoy my work here. I am getting along fine. This achool is far and much better than I expected. We have two very large modern new buildings here, value over a mitiglion dollars. The new high school building is the best I ever saw or ever heard of. By giving out the courses to you, you can imagine the building for high school students only. The courses are, besides regular neademic work, manual training, carpentry, automobile repairing, electrical work, domestic science, cooking and swimming.

The gym here is a well finished one with artistic decorations, finished off like an auditorium. The balcony work is really wonderful. The swimming pool is very fine and beautiful. It has a gallery for spectators. The room and pool is absolutely white with the floor being inlaid with various colors. Never saw a pool tike it. On the whole the building is modern or ahead of times. I am furnished with a large office, private locker room, store room and shower.

The people here are practically all foreigners, mostly Italians, Finnish and Greeks, also Bulgarians, Servians, Montonegrians and Austrians. Mining of iron ore is the chief occupation; population is 3,060. The city is wealthy and everything is bought one asks for. My gym is fully equipped with apparatus. The school furnishes absolutely everything free to teachers and the children or teachers.

I am sure gratified in securing such a wonderful position in these schools. Give my remembrance to Mrs. Smith and also to the remaining faculty.

Do you discriminate at the dining table—or are you thoughtless?

In thousands of homes, a "line" is drawn at the breakfast table. Tea or coffee is served for "grown-ups" and Postum for children. But some parenta do not discriminate. Caffeine and tannin, the injurious contents of coffee and tea, seriously retard the development of the delicate nerve tissues in children.

Consequently, instead of rich, satisfying Postum, children are over atimu-lated by the drugs in tea and collee; and so may grow up irritable and nervous. Any doctor can tell you that this is a great evil and should be

an older person, but in many cases the nervous system and allied bodily functions will become weakened. The surest way to avoid such possibilities is to quit coffee entirely and drink Postum instead. The change permits you to get sound, restful sleep.

-Postum is the wellknown, meal-time beverage. Like thousands of others you will like it because, in flavor, it is much like a high-grade.

Do away with the dis-tinction at the table. Serve delicious Postum, piping hot, to all the fam-ily. One week's trial and it is likely that you'll never return to tea and coffee,

Instead of Wallpaper, Paint or Kalsomine

Alabastine is a dry powder packed in five-pound packages in white and-a variety of beautiful colors ready to use by mixing with pure cold water, with full directions on every package.

Alabastine has been on the market for forty years, is a household word in every civilized country in the world. If unable to secure the services of a painter or decorator you can apply Alabastine yourself.

Important to Know

To secure Alabastine results you must get Alabastine; it is necessary to see that the package has the word "Alabastine" and the cross and circle printed in red.

When employing the services of a painter ask him to bring the Alabastine in unbroken packages and mixed on the job. This he will be glad to do to convince you that he is giving you what you desire and pay for.

Alabastine Over Painted Walls Have you had the experience after going to considerable expense to paint your walls, on the theory that they would be washable the same as your woodwork, of finding that after washing them they were grimy; streaked and unsatisfactory? Have you hesitated at the expense of again repainting them?

If the paint is solid on the wall and not scaling, go over it with a coat of Alabastine and be pleasantly surprised as to effects produced and saving effected. Alabastine may even be used over old soiled wallpaper that is firm on the wall not printed in aniline dyes or with raised figures.

You Can Always Get Alabastine There is hardly a town where Alabastine is not carried in stock by dealers who carry paints. If you do not find it and are offered something else claimed to be just as good, write us and we will tell you how to easily secure Alabastine.

Sample card of tints furnished by dealers or write to us direct.

Somebody suggested that it was time for the newspapers of the country to adopt a week in which their own business should be given precedent, and the Avalanche thoroughly endorses the idea.

The date set is the second week in November, from the 7th to the 12th, including that great world event,

The official title for the week will be "Subscribe for Your Home Town Paper Week.

Thousands of papers will join in this event, and our readers will hear more about it as time goes on.

Ever ready to help in any cause that is in the interests of a better community, better living conditions, and better government, we now ask the readers and advertisers of the Avalanche to turn in and lend a hand during "Subscribe for Your Home Town Paper Week," and boost for us.

THE TEACHER-HER IMPOR-TANCE.

The value of every school depends primarily upon the teacher. With palatial buildings and magnificent equipment no community has an effective school if the teachers are of indifferent ability. On the other hand, superior, if not the best work is possible in spite of inadequate physical conditions and meager supply of every teaching accessory if only the teacher is the right person. While the fact has been emphasiz-

ed thruout that the character of the child the home furnishes determines the product of education more than anything the school-itself can do such is the power of personal influence that pupils daily become what their teachers are. The teacher who or superficial invites discord and re-flects his objectionable qualities by mere presence; one who is normal, vigorous, alert, sympathetic, or thor-ough carries the spirit of energy and

when all school rooms are supplied with teachers of such wholesome influence, children will "go to school and not be sent—or sentenced"—as is now the case in too many schools, and less potentially excellent, human material will be spoiled. How kind nature must be not to permit utter ruin for those who must endure the second! If we seriously purpose to develop pupils into useful units of society, furnish schools, and compel attendance, what economy can justify selection of any except cap-able and inspiring teachers?—North American Teacher.

90% of all cars use Ford, Buick or Dodge Size Batteries

Because of this concentration, which means volume production, our manufacturing costs on these sizes are low, with prices correspondingly low.

However, we do not ask you to buy a Philadelphia Battery on its low price alone. Even more important to you is its reliability, its freedom from annoying little breakdowns, and the unusual fact that failure of insulation is made a basis for adjustment under all Philadelphia guarantees.

The table below shows a number of popular cars using Ford. Buick and Dodge sizes. It shows prices on three types of Philadelphia Batteries for each car. Any type will give you good service and with reasonable care will far outlast its guarantee. Which type you select—twelve, eighteen or twenty-four month guarantee—depends on the same considerations which control your selection of tires.

ATTORNEY ATTACKS CHARGES

Sherwood Declares Indicted Men Em ployes, and Net Officials of State Institution.

Marquette-Circuit Judge R. C. Flannigan will not rule at this ter of court on the motion to quash in dictments against defendants in the Marquette prison case charging unlawful purchase of state property, he

Judge Flannigan announced that he under advisement before 20 days and gave attorneys that length of time to file-briefs.

Arguments for and against the mo tion, to quash most of the indictments brought by the grand jury and on the demand by the defendants' council for bills of particulars explaining the charges against them if the indictments stand, have been heard by Judge Flannigan.

Myron J. Sherwood, attorney for the defendants, declared that indictments charging unlawful purchase of state property are irregular and should be quashed because they apply to officers of the prison, whereas, he contended, the persons indicted are not officers, within the meaning of the general prison law, but en ployes. As employes, he said, they had a right to purchase goods alleged to have been bought unlawfully.

clients did not charge felonies or misdemeanors within the meaning of the statute, but instead charged breaches of law which are not indictable.

Answering Mr. Sherwood's argu ments. Mr. Sherwood stressed his demand that if the indictments stand, the defendants must be furnished with amounts of property alleged to have been unlawfully purchased.

He contended it would be unjus to ask his clients to prepare a defense against charges so general as those put into the indictments.

When she did, he volunteered as a mechanic and chanfleur and spent two months in an army motor shop. Then he was transferred to a battoon school, but before he could get acquainted with the blimps they moved him again, this time to the company's personnel headquarters. He was in an officers' train-ing camp when the armistice came.

Entering Legion work early, Mr. Chapman was a member of the mittee which wrote the non-political clause into the organization's constifution. He boils down his blography to this: "I am a member of the A. F. & A. M., B. P. O. E., and K. of P. I am an American by and inclination; an Episcopallan by faith and a prohibitionist by law. The Verb Salvage.

The verb "to salvage" did not pass out of existence with the disbanding of the A. E. F. Its synonym, "to manage," is still recognized as part of the language of Legionnaires. George: R. Anderson post of the American Legion at Ardmore, Okla., recently "sal-vaged" a library of 2,000 volumes. As in the army days when anything from a mess kit to a five ton truck might have been acquired mysteriously with the simple explanation "we managed for it" or the equally expres-Rive "we relyiged it," the quired the library. During the war the people of Ardmore had collected a large number of books to be shipped o army camps for use of soldiers. But nfier the volumes were collected and boxed they were never shipped. They were discovered recently in a store and it did not take long to salvage them.

If all the manufacturers of rubber tires for motor cars in the United States were to operate up to the limit of their facilities twenty-four hours per day, the aggregate production per year would be in the vicinity of 37,000,000 tires.

Not one tire company that we know of could possibly operate full facilities twenty-four hours a day, therefore the aggregate production, under the most favorable circumstances, would not and could not be above 25,000,000 tires per year.

There are now, according to United States statistics, approximately 10,000,000 motor cars in daily use in the United States. At a conservative estimate each of these cars will consume at least two new tires annually, a total of 20,000,000 tires.

The annual and normal production of motor cars in the United States is now about 3,000,000. Each of these cars requires five tires or a total annually of 15,000,000 tires.

This means a demand of 35,000,000 tires annually, not taking into consideration the constant increase in the volume of cars in use and in the annual production of motor cars.

Therefore it is certain that the making of rubber tires is and will continue to be a profitable industry.

The Wildman Rubber Co. of Bay City Surely Presents an Attractive Investment Proposition

The Wildman Self-Sealing Pneumatic Inner Tube

This is the most important advance in tire making because it places in the hands of the cwners of motor cars an absolute self-sealing inner tube. Ask any motor car owner what this means. The Wildman Self-Sealing Pneumatic Inner Tube is fully covered with basic patents, both as to its design and the process of making. These are the exclusive property of the Wildman Rubber company and literally give that company the control of the inner tube markets of the world.

If the readers of this announcement could only appreciate the mighty significance of this fuct, we would be swamped with a rush of people to buy stock, because the profits which follow the possession of such a tremendously valuable and exclusive product can scarcely be imagined. Investigate

The Wildman Rubber Co.

Itay City, Michigan:

Gentlemen.—The writer was present today at the demonstration given by your company for newspaper representatives and others, in connection with your new inner tube, and was an eye-witness to all the various tests, etc., in fact I assisted in making the same.

It certainly was amazing to see ice picks, nails and other sharp us well as blunt instruments driven a number of times through the casing and tube of a lire filled with compressed sir, and to know that offer the withdrawal of these various things there was absolutely no

ing and tube of a tire filled with compressed air, and to know that after the withdrawal of these various things, there was absolutely no escape of air whatever, through the punctures.

Have had many flat tires during the number of years I have driven a car, and having those experiences in mind, the results of the tests are almost unbelievable. I assume many people would be increduleus unless they were in attendance at a demonstration, and saw what really wonderful results were achieved.

You have a most valuable asset in this much-needed tube, and there is no question in my mind but what it will advertise and sell itself in every community in which it is introduced; it fills a long-felt want and will be a boen to all owners and drivers of automobiles and trucks; undoubtedly in many instances the invention will do away

with the necessity of carrying spare tires.
All good wishes

W. G. MacEDWARD. Secretary. Bay City Board of Commerce.

The Wildman Rubber company is a Michigan industry. It is an assured success and you are invited to become a part of that company. We could wish it possible that all the stock of the company were held by people in Northeastern Michigan so that the golden harvests which are sure to come could be enjoyed entirely by ourselves. If you knew as we do, all the facts, you would not hesitate to come with us now and also urge your neighbors to buy

In five years from now there will be lots of people who will y: "I had a chance to buy stock in the Wildman Rubber company when it started.

Fill out the coupon and mail to us. Let us help you to investigate and analyze the solidity of our proposition.

CRAWFORD FARMER BELIEVES IN EFFICIENCY ON

Joins Hands With Dairy Experts to Prove Value of Good Sires,

en the Better Sire Train pe thru Grayling there was at least one farmer who served notice on the world that he belonged to that class of farmers who are on the watch for good investments and opportunities to increase the efficiency of their busness. When Mr. C. H. Howse of Frederic received a good well-bred male-calf from the Better Sire Train in exchange for his grade bull he proved that he is an up-to-date farmwith excellent judgment. The value of a good sire has been demon strated so many times and so forcibly that it is a mystery how anyone can excuse the existence of the scrubbull, and we are glad to note that Mr. Howse has joined hands with our dairy experts and other breeders to prove once more that the money ha vested in a purebred sire yields big dividends while the scrub-bull is the most expensive piece of equipment in the farm. "Blood will tell" and when it does

we may be sure that Mr. Howse's calf will give a good account of himself. Lakewood King Colantha Korndyke, as his calf is named, is the son of Maplecrest Korndyke Hengerveld of Maplecrest Korndyke Hengerveld who already has 86 daughters—that have made the Advanced Registry, which makes him one of the best builts in Michigan. Three of his daughters, as three-year-olds, averaged over 18,000 pounds of milk and 825 pounds of butter in a year while another one of his 3-yr-old daughters produced 17,849 pounds of milk in ten months. In siring offspring of that kind, old Maplecrest is only proving the quotation at the beginning of that kind, old Maplecrest is only proving the quotation at the beginning of this paragraph because his own dam and grandam averaged over 1240 pounds of butter in a year. When one considers that the average production for all the cows in U. S. is 160 pounds of butter and 4,000 pounds of milk, he can appreciate the breeding behind this calf of Mr. Howse, The dam, Colantha Mutual Fayne, is also well-bred, being a direct descendant of Johan Hengerveld Lad and other famous producers.

It is these years of breeding and

and other tamous producers.

It is these years of breeding and careful selection for production that makes the purebred more valuable than the serub and the wise farmer is the one who does what Mr. Howse did—take advantage of this careful plus event breeders and use selection by expert breeders and us their product to increase the efficiency of their own dairy. The farmers of Crawford County had a wonderful opwilliam Feldhauser of Maple For-est also purchased a pure-bred sire from this train. This was one that had been taken on at West Branch in exchange for a younger buil. This also is a fine animal and will do much to improve the stock on his farm.

A GOOD FRIEND.

A good friend stands by you when in need. Grayling people tell how Doan's Kidney Pills have stood the test. Niels H. Nielsen, carpenter of Park St. endorsed Doan's three years ago and again confirms the story. Could you ask for more convincing the story.

"My back ached day in and day out and was so stiff I could hardly bend one way or the other," says Mr. Nielson." The kidney secretions were too freequent in action, too. The last few times I have had these complaints I have taken a few boxes of Doan's Kidney Pills from Lewis' Drug Store and I have found they do me more good than anything else for they have always cured the attack in short order." (Statement given October 11, 1916.)
